Managed BaaS & DRaaS

Challenge

Organizations are challenged with the threat of downtime and data loss and have limited resources to ensure their business needs are met.

BaaS and DRaaS can help businesses stay secure, whether from accidental data deletion or ransomware, and can provide the peace of mind that comes with knowing you're protected. This enables you to focus on what matters most — the customers, innovation, and strategic initiatives that propel your business forward. Unlock the power of choice with managed BaaS and DRaaS solutions built on Veeam Data Platform with Veeam Cloud & Service Provider (VCSP) partners.

Managed Solutions

✓ **BaaS for Microsoft 365**

✓ **BaaS for the public cloud**

✓ **Managed and Off-site Backup**

✓ **DRaaS**

Key capabilities

One platform

As-a-service offerings built on a single platform that protects cloud, virtual, and physical workloads.

Data Security

From immutable storage to multi-factor authentication and inline malware detection, Veeam Data Platform is designed with cybersecurity in mind.
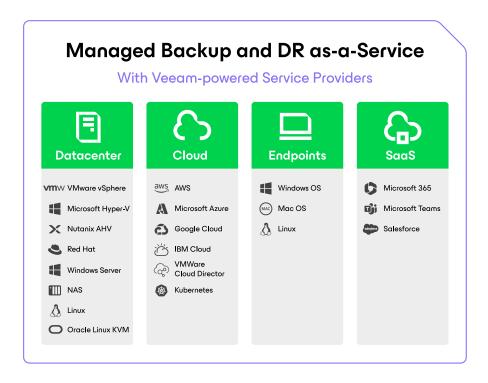

Data Recovery

Instant recovery options to eliminate downtime for your most critical assets.

Data Freedom

No data lock-ins and a portable data format that enables seamless migration.

Specialized Expertise

Veeam-powered BaaS & DRaaS providers support planning, implementation, monitoring, management, compliance, and more.

Managed on Your Terms

With Veeam Competency partners, you choose your service level agreements (SLAs) and management level, ranging from hands-on to fully managed.

Protected workloads

Managed Backup and DR as-a-Service
With Veeam-powered Service Providers

Datacenter
- **vmw** VMware vSphere
- Microsoft Hyper-V
- Nutanix AHV
- Red Hat
- Windows Server
- NAS
- Linux
- Oracle Linux KVM

Cloud
- **aws** AWS
- Microsoft Azure
- Google Cloud
- IBM Cloud
- VMWare Cloud Director
- Kubernetes

Endpoints
- Windows OS
- Mac OS
- Linux

SaaS
- Microsoft 365
- Microsoft Teams
- Salesforce

According to the 2024 Cloud Protection Trends report:

54%
of servers are protected by BaaS or DRaaS

49%
using cloud storage switched to managed BaaS

34%
use BaaS to free up internal resources

29%
choose DRaaS for business continuity/ disaster recovery (BC/DR) implementation expertise
